

# Remaining Summer Semester classes:

## Beaded Spiral Magic (Workshop)

**Instructor:** Naomi Profesorsky

Bead weaving is the art of using beads, thread and needle to create wearable jewelry. In this class we will learn to create one of the most useful and quick beading stitches: the spiral rope. We will make a vibrant bracelet in a stitch that can be used for necklaces, earrings and more. No experience needed – come and create with us. *This is a workshop and does not include a studio pass.* Visit Naomi's website: [jewelrybynaomi.com](http://jewelrybynaomi.com).

Thursday evening, July 13, 6:30 – 9:30 p.m.

### Class fee

I = \$ 15

II = \$ 21

III = \$ 23

# Wind Chimes and Mobiles

**Instructor:** Deborah Rodgers

Take some stained glass, add wire & metal, perhaps some beads or broken china and mix well to create the perfect recipe for a summer wind chime or mobile. Brighten up your home or residence hall room with colorful glass “dancing” in the sunlight.

**Friday, July 14, 6:30 pm - 9:30 pm; Saturday & Sunday, July 15 & 16, 10:00 a.m. - 5:00 p.m.**

**Prerequisites:** Students must have completed the *Introduction to Stained Glass* class or have equivalent experience.

## **Class fee**

I = \$ 77

II = \$ 115

III = \$ 124

# Handmade Natural Body Care: Lotions, Soaps, and Lip Balm

Instructor: Angel Cruz

Make your own body care products in a casual and fun setting, including organic lip balm, body butter, Castile soap and goat's milk soap! You will be able to take home plenty of products to try, as well as enough for gifts for family and friends. Students need to bring their own 4- to 6-quart stainless steel pot to melt ingredients in and a few additional items; a supply list will be furnished following registration.

**Saturday, July 15, 12:00 p.m. - 5:00 p.m., and Sunday, July 16, 1:00 p.m. - 5:00 p.m.**

## **Class fee**

I = \$57

II = \$77

III = \$82

# Images and Script: An Introduction to the Shopbot CNC Router

**Instructor:** Stephen Reeves

An introduction to the Crafts Center's ShopBot router, students will design imagery, create tool paths and execute basic cuts. CAD (computer-aided design) software will be used to develop imagery before setting up the machine to cut and inlay designs into matching pockets on contrasting hardwood. Engraving of script and other designs will be explored to embellish wooden plaques. Class fee includes practice wood and cutting bits furnished during the class. *You must provide your own cutting bits for use outside of class.*

**Tuesday evenings for 3 weeks, 6:30 - 9:30 p.m., July 11 – 25**

**Prerequisites:** Must be proficient in the arts of digital drafting and related digital creativity.

## **Class fee**

I = \$ 35

II = \$ 55

III = \$ 60

# Making the Longboard Skateboard Deck

**Instructor:** Braden Walker

*No experience needed.* Intensely hands-on! Make a custom-sized longboard skateboard you can ride and enjoy for years. Students will learn to laminate plies of Baltic birch into the necessary complex curves. The form will then be cut with the band saw, drilled, routed and sanded to final shape. By the end of the three classes, you will have a finished longboard deck ready for wheels. The class fee includes Baltic birch plywood, glue and use of all tools to make one board of your own design (trucks and wheels not included).

**Section A: Monday evenings for 3 weeks, 6:00 - 9:00 p.m., July 10 – 24**

**Section B: Thursday evenings for 3 weeks, 6:00 - 9:00 p.m., July 6 – 27 (skip July 13)**

**Class fee** (*includes a studio pass for the semester*)

I = \$ 43

II = \$ 63

III = \$ 68
